

## **QUALITY POLICY STATEMENT**

Ale Construction Limited is a contracting company working in the field of civil engineering and specialises in the design and construction of sheet piling, specialist piling, shafts, tunnels and other underground structures. The Company is committed to providing and improving professional engineering services and good workmanship in delivering its Specialist Civil Engineering Services and seeks to ensure and wherever practical enhance the levels of client satisfaction. The Company has established a quality management system which is based on a process of continuous improvement and the prevention rather than the correction of non-conformance. This policy is reviewed for continuing suitability at each Management Review.

In particular Ale Construction will:

- Develop strong relationships with both clients and those suppliers who contribute to improving the quality of its Specialist Civil Engineering Service.
- Continually improve the quality management system through employee involvement.
- Provide all employees with the training, resources, and support necessary to provide quality solutions.
- Establish an environment that supports the delivery of high quality operations and service.
- Give individual responsibilities and accountability for the quality management system to employees.
- Actively encourage each employee to realise his or her full potential.
- Properly communicate the Quality Policy and Quality Objectives to all employees.
- Set and review Quality Objectives through and following Management Review objectives will be converted into individual measurable and progress regularly tracked activities.
- Foster the concept of a team approach within the organisation based on increasing the Company's competitiveness by way of improved quality and productivity.
- Undertake its specialist Civil Engineering Service in full compliance with Statutory Legislation, Regulations, current relevant European Directives and its client's special operational, safety and environmental management requirements (eg in Network Rail Controlled Infrastructure contracts), when applicable.
- At appropriate intervals carry-out a systematic evaluation of risk associated with both for the Company proposed/existing strategies to inform business development.

This policy will be communicated to all staff and any necessary external interested parties and will be available to the public by request or through display on the Company's website [www.daace.co.uk](http://www.daace.co.uk) . It will be revised by the Managing Director as necessary

To facilitate the implementation of this policy the Company has established and will maintain quality management system that meets the requirements of the quality management system BS EN ISO 9001: 2015.
